Phone: +81-90-3524-7064
Email: kiwamu@debian.or.jp
Homepage: <http://masterq.metasepi-design.com/>

Brief

I launched my career on developing embedded devices using Unix-like kernel at Ricoh Company, Ltd. The experience was not only for designing device drivers but also including debug of virtual memory. And I have experience in IoT platform such as ARM Cortex-M MCU and RTOS. Also I learned application design using functional language such as Haskell¹, and published some research papers² about such languages.

Skill Set

Deep knowledge for Unix-like Kernel and User Space

I am an expert for Unix-like kernel such as Linux, because I provided technical support for NetBSD³, which is a Unix-like OS similar to Linux, at Ricoh. My skill is not only for NetBSD but also Linux. In fact, a race condition bug in PowerPC Linux kernel was fixed by me in only five days at MIRACLE LINUX.

Wide experience in IoT platform

I have a wide experience in IoT platform such as FreeRTOS, ChibiOS/RT⁴, ARM Cortex-M, ESP8266, AVR and MSP430. Also I launched a new IoT business using TWELITE wireless platform⁵ at Centillion Japan.

Research Security and Quality

A prototype of own Secure-OS similar to OP-TEE⁶ was designed by me at SELTECH. It runs with the other RTOS on ARM Cortex-M MCU. Also I have a wealth of experience in strong static typing language such as Haskell and verification of C language such as VeriFast⁷, which are useful to keep the quality of products.

Good documentation writer

I have some experiences to write formal academic papers. And also I have translated many English documents about open-source software into Japanese^{8,9,10}. And I have used translation tools such as gettext¹¹ or po4a¹² to maintain my translations.

Work Experience

October 2019 - Present: Software Engineer (trustee agreement) at QuantumCore CORPORATION

Responsibilities:

- Porting a machine learning called “reservoir computing” onto ARM Cortex-M MCU
- Porting the machine learning onto Android platform

Key Achievements:

- Developed a library for linear algebra running on ARM Cortex-M MCU

July 2013 - Present: Freelance Researcher

Responsibilities:

- Researching and developing Ajhc Haskell Compiler¹³
- ATS language¹⁴ evangelist for embedded devices
- Verification evangelist using VeriFast¹⁵, which is a verifier C language programs annotated with preconditions and postconditions

Key Achievements:

- Published some research papers¹⁶
- Translated ATS documents into Japanese¹⁷
- Translated VeriFast documents into Japanese¹⁸

February 2018 - July 2018: Software Architect at SHINKAWA LTD.

Responsibilities:

- Researched and developed new software platform for wire bonding during semiconductor device fabrication

Key Achievements:

- Created a parser to understand SHINKAWA own embedded script language
- Evaluated EtherCAT¹⁹ protocol for the realtime application

¹⁹<https://www.ethercat.org/>

August 2014 - October 2017: Part-time Researcher at RIKEN Advanced Institute for Computational Science

Responsibilities:

- Researched functional programming for embedded platform

Key Achievements:

- Published some research papers²⁰

November 2016 - October 2017: Expert Engineer (permanent employee) at SELTECH CORPORATION

Responsibilities:

- Researched and developed new Secure-OS for ARM Cortex-M platform

February 2016 - November 2016: Software Engineer (contract employee) at Life Robotics Inc.

Responsibilities:

- Developed GUI application running on Ubuntu OS, using C++ and Qt²¹ for single arm robot

Key Achievements:

- Designed a network protocol for the robotics application

March 2015 - February 2016: System Enginner (contract employee) at Centillion Japan Co., Ltd.

Responsibilities:

- Technical support for stock chart application using JavaScript
- Maintained MySQL database servers
- Manager for offshore development in China

Key Achievements:

- Launched new IoT business for farming
- Design a platform²² to accelerate R²³ programs

September 2014 - December 2014: Software engineer (trustee agreement) at Axsh co., LTD.

Responsibilities:

- Developed an OpenFlow application named “OpenVNet”²⁴

Key Achievements:

- Provisioned and automated deploying the OpenVNet on AWS platform using Ruby and GNU make

²⁴<https://github.com/axsh/openvnet>

March 2012 - July 2013: Software Engineer (permanent employee) at MIRACLE LINUX CORPORATION

Responsibilities:

- Developed own Digital Signage platform running on Intel architecture using Linux OS, C++, OpenGL, GTK+²⁵, GStreamer²⁶
- Supported and debugged own Linux distribution

Key Achievements:

- Debugged and fixed a race condition in the SMP kernel on PowerPC platform
- Debugged and fixed bug of crash²⁷ command's PowerPC virtual memory
- Designed new Windows installer using NSIS²⁸

April 2001 - February 2012: Software Development Engineer (permanent employee) at Ricoh Company, Ltd.

Responsibilities:

- Developed own platform for multi-function printer based on NetBSD OS

Key Achievements:

- Developed OptionBIOS and bootloader for the platform on Intel architecture
- Designed secure boot for the platform on Intel architecture
- Compressed boot time of the printer onto 10 seconds
- Verified m:n POSIX thread library

Education

- March 2001: Master of Engineering from Department of Electrical and Electronic Engineering, Tokyo Metropolitan University.
The thesis: "Multimode Quartz Crystal Microbalance"²⁹

Publications and Reports

Activities

Open-source projects

Metasepi Project³⁴

- Challenge to create an open-source Unix-like operating system designed with strong type such as ML or Haskell.
- Rewriting NetBSD kernel using Ajhc Haskell compiler. <https://github.com/metasepi/netbsd-arafura-s1>

Ajhc Haskell compiler³⁵

- Extend and add embedded features to Jhc Haskell Compiler <http://repetae.net/computer/jhc/>.
- Ajhc has thread-safe and reentrant runtime. Also has Erlang style GC. It means Ajhc’s Haskell context has own GC heap. GC can run on tiny CPU such as Cortex-M3 with 32kB RAM.

Japan ATS User Group³⁶

- An user group for ATS language promotion of utilization. Translating ATS documents into Japanese.

Debian Maintainer³⁷

- Maintained uim package at Debian squeeze, and packages using Haskell at sid.

Computer Skills

- Languages: C, C++, Haskell, Intel/ARM assembler, Ruby, OCaml, Python, Erlang, JavaScript, R
- Platforms: Linux, NetBSD, FreeRTOS, ChibiOS/RT, Android NDK, Cygwin, MinGW, Bare metal
